Empowering the future through Sustainable AI and Industry 5.0

IN COLLABORATION WITH

The Indian Econometric Society (TIES)

ORGANISED BY

School of Commerce, Management and Research
ITM University, Raipur (C.G.), India

11 SEPTEMBER 2026

ONLINE

ONE DAY ONLINE INTERNATIONAL CONFERENCE • 11TH SEPTEMBER, 2026

ABOUT THE CONFERENCE

Artificial Intelligence (AI) is transforming industries, economies, and societies by enhancing productivity, innovation, and decision-making. As the world moves toward Industry 5.0, the emphasis shifts from automation to creating human-centric, resilient, and sustainable systems where AI complements human capabilities. Sustainable AI promotes the ethical, transparent, and responsible use of intelligent technologies while supporting energy efficiency, environmental sustainability, and inclusive economic growth. This convergence enables organizations and policymakers to optimize resources, strengthen resilience, and foster innovation for sustainable development.

Across disciplines, AI is reshaping business functions by improving strategic decision-making, operational efficiency, and organizational performance. In HR Management, AI supports talent acquisition, workforce development, employee well-being, and ethical people management. In Finance, it enhances planning, risk management, fraud detection, and sustainable investment decisions. In Management, AI drives innovation, agile leadership, customer-centric strategies, and resilient business models. In Economics, AI strengthens economic forecasting, policy analysis, productivity enhancement, inclusive growth, digital transformation, and evidence-based decision-making for sustainable development. Together, Sustainable AI and Industry 5.0 provide a multidisciplinary framework for advancing responsible innovation, organizational excellence, and sustainable economic development.

SCHOOL OF COMMERCE, MANAGEMENT AND RESEARCH (SCMR)

The School of Commerce, Management and Research (SCMR)

is a constituent unit of ITM University, Raipur, dedicated to excellence in teaching, research, innovation, and industry engagement. The school strives to nurture future-ready professionals by offering quality education, promoting interdisciplinary research, and fostering strong industry-academia collaboration. ITM University, Raipur, one of the multidisciplinary universities in Central India, is committed to academic excellence, research-driven innovation, and experiential learning across diverse disciplines. SCMR actively contributes to this vision by organizing conferences, faculty development programmes, research initiatives, and industry interactions that address contemporary business and societal challenges.

CONFERENCE THEMES / TRACKS

The conference invites original research papers, conceptual papers, case studies, and review articles on (but not limited to) the following discipline-wise tracks and sub-themes:
